

# CAUTION

Before operating the robot or handling the battery, review the following:

- **DO NOT** leave the battery in the robot when not in use
  - **DO NOT** leave the battery connected to the charger when fully charged
  - **DO NOT** leave the battery in storage for longer than 2 weeks without checking the state of charge
  - **DO NOT** touch the battery cables before grounding yourself on a metal object and touching the battery housing
  - **DO NOT** connect battery power to Cassie if either switch is on
  - **DO NOT** unplug the power cable if the charger indicator is not green, or any of the LEDs on Cassie are on
  - **DO NOT** use the battery in the robot or charger if the battery status checker reports an internal temperature of  $>40^{\circ}\text{C}$
- 
- **DO** plug in the power cable before the data cable when connecting to the charger or Cassie
  - **DO** run the battery status checker script and record state of charge on the check in sheet
  - **DO** charge the battery when state of charge is  $< 50\%$
